

Canyon Gold Corp.

received the first tranche of funding for its DTC Scanner Production.

Las Vegas, Nevada--(Newsfile Corp. – May 23, 2016) - [Canyon Gold Corp.](#) (OTCQB: CGCC) (The Company) is pleased to announce that it received the first tranche of funding for the Initial production of our patented proprietary DTC 'Offender Passive Alert Scan'.

"We are pleased that based on a stronger market of our securities a European Group is starting to provide funding for the start-up of the Initial production of our revolutionary Scanning Unit in the amount of \$25,000.00, with a commitment to provide further funding for completion of the initial production and start of mass production of the Scanning Units" said President Merrill Moses.

The Company requires a total of \$50,000.00 to initially manufacture 2 sets of 5 Scanning Units each. We plan to initially install 5 units in a demonstration school and at a major sport stadium at a basic cost to the buyer of only \$2,000.00 per unit or a total of \$10,000.00. This cost is exceptionally competitive and value-justified by the safety, security and personal privacy affects that our Scanners will bring to the venues. The revolutionary technology is without peer in the market for such security applications.

Our **Offender Alert Passive Scan™**

is a 'next generation' walk-through detector scanning unit.

The DTC scan-system is passive and emits nothing through the subject.
(Scanner systems currently in the market are effectively an X-RAY in some form)

It is a '**next generation' walk-through detector scanning unit. This patented & trademarked product** is an advanced passive scanning system for detecting and identifying concealed threats. The program provides a visual image of where the items are located on the suspect, as well as an approximation of the size of the item (with optional equipment). With cameras available at the facility, the system will instantly relay the image of the suspect, position and time of the offending alert. The picture can be transmitted to security, management or any designated recipient and can be retained in the memory log of the computer.
