Defense Technologies Adds Digital Imaging To Its 'Passive Security Scan' Portal

Las Vegas, Nevada--(Newsfile Corp. – August 03, 2017) – Defense Technologies International Corp. (OTC-DTII) (The Company), a developer of security technologies is pleased to announce that it has added digital imaging to its 'Passive Security Scan' portal.

To maximize security, a **Digital Imaging Feature** has been added to its current prototype scanner. This added, optional, feature now allows for unlimited review.

“With the successful conclusion of our last and final inhouse lab test of the new unit... we are now ready to go to market with our 'Passive Security Scan' units. We are currently and presently in the process of finalizing our Nationwide marketing program to start this marketing program in the very near future”, *says the Company President Mr. Moses.*

The Company's Business – The 'Passive Security Scan'

The Company's '**Passive Security Scan**' is a unique “next generation” walk-through detector scanning unit. This patented and trademarked passive scanning system allows for detecting and identifying concealed threats such as guns, knives, etc. Unlike other scanners the public is more familiar with, the **Passive Security Scan** does NOT use X-rays to detect threats.

Serious health concerns have been raised over the repeated exposure to X-rays from **OTHER SCANNING MACHINES CURRENTLY IN USE.** The **Passive Security Scan** technology is based on the 'Earth Magnetic Fields' has no emission whatsoever and is therefore extremely safe and harmless to the person passing through our portal.
