Defense Technologies International Corp. Presenting the 'Passive Portal' at the TASBO Convention.

Las Vegas, Nevada--(Newsfile Corp. – June 14, 2018) – Defense Technologies International Corp. (DTII) is pleased to announce its subsidiary, Passive Security Scan Inc. (PSSI), will be attending the annual state-wide TASBO Convention (Texas Association of School Business Officials) in Corpus Christi, Texas on June 18-20.

TASBO is an independent, not-for-profit professional association that is dedicated to being the trusted resource for school finance and operations for schools in Texas and represents the Texas branch of ASBO Intl. (Association of School Business Officials International). Currently TASBO has approximately 6,500 members representing more than 1,200 school districts in Texas.

PSSI's Marketing Director, Luke Hillbery, will be showcasing the Passive Security Scan Technology with the latest **Passive Portal** on display at the TASBO Convention Exhibition Hall. This represents the first opportunity to publicly demonstrate this technology before school board officials and other likeminded parties.

For more information on the Passive Security Scan Technology and the *Passive Portal*, visit www.passivesecurityscan.com.

For more information on TASBO and how to attend, visit www.tasbo.org.

Exploring the US and International Markets.

In addition to the exposure of our 'Passive Security Scan' technology at the TASBO Convention, we are exploring relationships that will reflect the technology and efforts put forth not only to the US Government but internationally as well.

"We are very pleased and proud" said Merrill W. Moses Defense Technologies International Corp's President and CEO. "To be able to present our 'Children's Safe', weapons and metal scanner to other in the know 'decision makers'. Decision makers who decide where their school budget dollars go... To books and teachers and music and the arts, all important subjects. But why not for protection as well? Being that our Children are our most precious commodity, our future, and our posterity".

The "**Passive Portal**" technology is based on the 'Earth's Magnetic Fields' with no emissions emitted for detection and is therefore extremely safe to any person passing through the '**Passive Portal**'. The Passive Security Scan system uses highly developed field sensing technology using patented methods to sense and pin point the location of contraband detected.

We are pleased to present the Company's Subsidiary's **Video Production** about the "Passive Security Scan" Project.

Forward-Looking Statements

This news release contains certain statements that may be deemed "forward-looking" statements. Forward looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in forward looking statements. Forward looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made. Except as required by law, the Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.
