**NOTE -1: BASIS OF PRESENTATION AND ORGANIZATION**

Defense Technologies International Corp. (the "Company ") was incorporated in the State of Delaware on May 27, 1998. Effective June 15, 2016, the Company changed its name to Defense Technologies International Corp. from Canyon Gold Corp. to more fully represent the Company's expansion goals into the advanced technology sector.

On October 19, 2016, the Company entered into a Definitive Agreement with Controlled Capture Systems, LLC ("CCS"), representing the inventor of the technology and assets previously acquired by DTC, that included a new exclusive Patent License Agreement and Independent Contractor agreement. Under the license agreement with CCS, the Company acquired the world-wide exclusive rights and privileges to the CCS security technology, patents, products and improvements. The Company agreed to pay CCS an initial licensing fee of \$25,000 and to pay ongoing royalties as defined in the Definitive Agreement. On May 30, 2018 the Company and Control Capture Systems, LLC amended their license agreement as follows (1) Royalty payments of 5% of gross sale from the license agreement will be calculated and paid quarterly with a minimum of \$12,500 paid each quarter (2) All payment will be in US dollars or stock of the Company and or its subsidiary. The value of the stock will be a discount to market of 25% of the average trading price for the 10 days prior to conversion. The number of shares received by Control Capture prior to any reverse split are anti-dilutive (3) Invoices for parts and materials will be billed separate of the license fees noted above.

Effective January 12, 2017, Passive Security Scan, Inc. ("PSSI") was incorporated in the state of Utah as subsidiary controlled by the Company. The Company transferred to PSSI its exclusive world-wide license to the defense, detection and protection security products previously acquired by the Company. The Company currently owns 76.28% of PSSI with 23.72% acquired by several individuals and entities. The Company plans to continue the development of the technology and conduct all sales and marketing activities in PSSI.

Basis of Presentation

These condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States. The Company's fiscal year end is April 30.

The interim condensed consolidated financial statements have been prepared without audit in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Securities and Exchange Commission ("SEC") Form 10-Q. They do not include all the information and footnotes required by generally accepted accounting principles for complete financial statements. Therefore, these unaudited interim condensed consolidated financial statements should be read in conjunction with the Company's audited financial statements and notes thereto for the year ended April 30, 2020 included in its Annual Report on Form 10-K filed with the SEC.

The interim condensed consolidated financial statements included herein are unaudited; however, they contain all normal recurring accruals and adjustments that, in the opinion of management, are necessary to present fairly the Company's consolidated financial position as of July 31, 2020, the consolidated results of its operations and its consolidated cash flows for the three months ended July 31, 2020 and 2019 The results of operations for any interim period are not necessarily indicative of the results to be expected for the full fiscal year.

## Consolidation and Non-Controlling Interest

These consolidated financial statements include the accounts of the Company, and its majority-owned subsidiary, PSSI, from its formation on January 12, 2017 to date. All inter-company transactions and balances have been eliminated.

## Inventory

Inventories are stated at the lower of cost using the first-in, first-out (FIFO) cost method of accounting. Inventories as of July 31, 2020 consist of parts used in assembly of the units being sold with no work in progress or finished goods. As of July 31, 2020 and April 30, 2020 the value of the inventory was \$23,235 and \$21,368, respectively.

## Equipment

Equipment is carried at the cost of acquisition and depreciated over the estimated useful lives of the assets. Costs associated with repair and maintenance is expensed as incurred. Costs associated with improvements which extend the life, increase the capacity or improve the efficiency of our property and equipment are capitalized and depreciated over the remaining life of the related asset. Gains and losses on dispositions of equipment are reflected in operations. Depreciation is provided using the straight-line method over the estimated useful lives of the assets of three years. As of July 31, 2020 had fixed assets net of depreciation of \$29,080 compared to \$31,996 as of April 30, 2020.

## Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

## Impairment of Long-Lived Assets

We continually monitor events and changes in circumstances that could indicate carrying amounts of long-lived assets may not be recoverable. When such events or changes in circumstances are present, we assess the recoverability of long-lived assets by determining whether the carrying value of such assets will be recovered through undiscounted expected future cash flows. If the total of the future cash flows is less than the carrying amount of those assets, we recognize an impairment loss based on the excess of the carrying amount over the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or the fair value less costs to sell. On April 30, 2019, the Company elected to impair its licenses agreement of \$378,600 so as of July 31, 2020, no impairment of asset was necessary.

## Net Income (Loss) per Common Share

Basic net income or loss per common share is calculated by dividing the Company's net income or loss by the weighted average number of common shares outstanding during the period. Diluted net income or loss per common share is calculated by dividing the Company's net income or loss by sum of the weighted average number of common shares outstanding and the dilutive potential common share equivalents then outstanding. Potential dilutive common share equivalents consist of shares issuable upon exercise of outstanding stock options and warrants, using the treasury stock method and the average market price per share during the period, and conversion of convertible debt, using the if converted method. As of July 31, 2020, the Company had potential shares issuable under convertible preferred shares, outstanding options, warrants and convertible debt for a total of 95,542,005. With the loss in operations for the three-month period ended July 31, 2020, the additional shares were determined to be non-dilutive.

## Recent Accounting Pronouncements

In February 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2016-02, "Leases (Topic 842)". The amendments in this ASU revise the accounting related to lessee accounting. Under the new guidance, lessees is required to recognize a lease liability and a right-of-use asset for all leases. The new lease guidance also simplifies the accounting for sale and leaseback transactions primarily because lessees must recognize lease assets and lease liabilities. The amendments in this ASU are effective for public companies for fiscal years beginning after December 15, 2018 and are to be applied through a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. Early adoption is permitted. The Company has adopted the new accounting pronouncement and is recording a lease use asset and lease liability as of May 31, 2019.

## **NOTE - 2: GOING CONCERN**

These condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America applicable to a going concern. Through July 31, 2020, the Company has no revenues, has accumulated deficit of \$10,486,631 and a working capital deficit of \$4,018,451 and expects to incur further losses in the development of its business. The Company has not yet established an ongoing source of revenue sufficient to cover operating costs, which raises substantial doubt about its ability to continue as a going concern. The financial statements do not include any adjustment that might result from the outcome of this uncertainty.

Management plans to continue to provide for the Company's capital needs during the year ending April 30, 2020 by issuing debt and equity securities and by the continued support of its related parties. The condensed consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

## **NOTE – 3: INVESTMENTS**

Effective January 12, 2017, Passive Security Scan, Inc. ("PSSI") was incorporated in the state of Utah as subsidiary controlled by the Company. The Company transferred to PSSI its exclusive world-wide license to the defense, detection and protection security products previously acquired by the Company for 17,500 shares of PSSI valued at \$378,600 for 76.28% of PSSI. The balance of PSSI was acquired by four individuals and entities. The Company plans to continue the development of the technology and conduct all sales and marketing activities in PSSI. The investment was impaired as of April 30, 2019.

## **NOTE - 4: RELATED PARTY TRANSACTIONS**

Management and administrative services are currently compensated as per a Service Agreement between the Company and its Chief Executive Officer and Director executed on April 25, 2016 and a Service Agreement with the subsidiary PSSI executed on January 12, 2017, a Service Agreement between the Company and a Director executed on May 20, 2016, and an Administration Agreement with a related party executed on March 15, 2011 and renewed on May 1, 2017 plus the assumption of a Service Agreement with the subsidiary PSSI assumed on January 12, 2017, whereby the fee is based on services provided and invoiced by the related parties on a monthly basis and the fees are paid in cash when possible or with common stock. The Company also, from time to time, has some of its expenses paid by related parties with the intent to repay. These types of transactions, when incurred, result in payables to related parties in the Company's consolidated financial statements as a necessary part of funding the Company's operations.

As of July 31, 2020, and April 30, 2020, the Company had payable balances due to related parties totaling \$1,028,122 and \$970,547, respectively, which resulted from transactions with these related parties and other significant shareholders.

#### **NOTE – 5: NOTES PAYABLE**

On July 6, 2018, the Company signed an investment agreement with a third party. Under the terms of the agreement the Company received \$250,000 through the Company attorney's trust account. On July 12, 2018, the Company received the \$250,000 less wire and legal payment of \$10,045. In addition the note holder will receive a royalty of 5% up to \$250,000 and then a royalty of 3.5% for two years thereafter. The note holder will receive 150,000 shares of the Company's common stock plus 100,000 warrants to purchase common shares within three years at \$2.50 per share.

On January 26, 2019, the Company approved a loan from Brian McLain of \$275,000. The note is convertible into common stock of the Company and is non-dilutive for 2 years from date of the note. In addition the Company granted the lender 100,000 warrants convertible into common shares at \$1.00 per share. As of July 31, 2020, \$25,000 of the loan was funded by the lender.

As of July 31, 2020 and April 30, 2020 the outstanding balances of notes payable was \$424,226, respectively.

#### **NOTE – 6: CONVERTIBLE DEBT**

On May 22, 2018, the Company signed an agreement with an investor for a loan of \$25,000. The note is convertible 180 days after the date of the note to shares of the Company's common stock at \$0.75 per share or a 25% discount to the 10 day trading average prior to conversion; whichever is lower. The total amount of the loan must be converted on the date of conversion. The note has an annual interest rate of 6%.

On July 10, 2018 RAB Investments AG agreed to buy the outstanding convertible debt from Jabro Funds for \$35,000. The Company as part of the agreement paid Jabro Funds the \$35,000 for the debt and considered it retired and paid in full.

On May 6, 2019, the Company issued an 8% convertible note to Black Ice Advisors, LLC for \$57,500 which matures on May 6, 2020. The note redeemable at a premium up to 140% of the face value within 180 days of issuance or is convertible after 180 days to the Company common stock at 60% of the lowest trading price twenty days prior to conversion.

#### **NOTE – 7: FAIR VALUE MEASUREMENTS AND DERIVATIVE LIABILITIES**

As defined in (Financial Accounting Standards Board ASC 820), fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). The Company utilized the market data of similar entities in its industry or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated, or generally unobservable. The Company classifies fair value balances based on the observability of those inputs. FASB ASC 820 establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurement).

The three levels of the fair value hierarchy are as follows:

- Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis. Level 1 primarily consists of financial instruments such as exchange-traded derivatives, marketable securities and listed equities.
- Level 2 - Pricing inputs are other than quoted prices in active markets included in level 1, which are either directly or indirectly observable as of the reported date and includes those financial instruments that are valued using models or other valuation methodologies. These models are primarily industry-standard models that consider various assumptions, including quoted forward prices for commodities, time value, volatility factors, and current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Substantially all of these assumptions are observable in the marketplace throughout the full term of the instrument, can be derived from observable data or are supported by observable levels at which transactions are executed in the marketplace. Instruments in this category generally include non-exchange-traded derivatives such as commodity swaps, interest rate swaps, options and collars.
- Level 3 – Pricing inputs include significant inputs that are generally less observable from objective sources. These inputs may be used with internally developed methodologies that result in management’s best estimate of fair value.

As of July 31, 2020, the Company believes the amounts reported for cash, payables, accrued liabilities and amounts due to related parties approximate their fair values due to the nature or duration of these instruments.

The following table represents the change in the fair value of the derivative liabilities during the three months ended July 31, 2020:

	Level 1	Level 2	Level 3
Balance at April 30, 2020	\$ --	\$ --	\$ 1,333,288
Retirement of derivative at conversion			(237,433)
Change in fair value of derivative liability	\$ --	\$ --	\$ (66,056)
Balance at July 31, 2020	<u>\$ --</u>	<u>\$ --</u>	<u>\$ 1,029,799</u>

The estimated fair value of the derivative liabilities at July 31, 2020 was calculated using the Binomial Lattice pricing model with the following assumptions:

Risk-free interest rate	2.00%
Expected life in years	0.25 to 0.85
Dividend yield	0%
Expected volatility	443.00%

## **NOTE – 8: EQUITY**

## **Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations**

### **Overview**

The following information should be read in conjunction with the condensed consolidated financial statements and notes thereto appearing elsewhere in this Form 10-Q.

Defense Technologies International Corp. (the "Company ") was incorporated in the State of Delaware on May 27, 1998. Effective June 15, 2016, the Company changed its name to Defense Technologies International Corp. from Canyon Gold Corp. to more fully represent the Company's expansion goals into the advanced technology sector.

On October 19, 2016, the Company entered into a Definitive Agreement with Controlled Capture Systems, LLC ("CCS"), representing the inventor of the technology and assets previously acquired by DTC, that included a new exclusive Patent License Agreement and Independent Contractor agreement. Under the license agreement with CCS, the Company acquired the world-wide exclusive rights and privileges to the CCS security technology, patents, products, and improvements. The Company agreed to pay CCS an initial licensing fee of \$25,000 and to pay ongoing royalties as defined in the Definitive Agreement.

On May 30, 2018 the Company and Control Capture Systems, LLC amended their license agreement as follows (1) Royalty payments of 5% of gross sale from the license agreement will be calculated and paid quarterly with a minimum of \$12,500 paid each quarter (2) All payment will be in US dollars or stock of the Company and or its subsidiary. The value of the stock will be a discount to market of 25% of the average trading price for the 10 days prior to conversion. The number of shares received by Control Capture prior to any reverse split are anti-dilutive.

Effective January 12, 2017, Passive Security Scan, Inc. ("PSSI") was incorporated in the state of Utah as subsidiary controlled by the Company. The Company transferred to PSSI its exclusive world-wide license to the defense, detection and protection security products previously acquired by the Company. The Company owns 79.8% of PSSI with 20.2% acquired by several individuals and entities. The Company plans to continue the development of the technology and conduct all sales and marketing activities in PSSI.

The occurrence of an uncontrollable event such as the COVID-19 pandemic may negatively affect our operations. A pandemic typically results in social distancing, travel bans, and quarantine. This may limit access to our, customers, management, support staff and professional advisors. As the Company's operations, are the continual building and sales of units we cannot measure what the impact may be but we do not anticipate a significant impact on our operations or financial condition, except for potential initial reduction for the sale of our product.

### **Forward Looking and Cautionary Statements**

This report contains forward-looking statements relating to future events or our future financial performance. In some cases, you can identify forward-looking statements by terminology such as "may," "will," "should," "expect," "intend," "plan," "anticipate," "believe," "estimate," "predict," "potential," "continue," or similar terms, variations of such terms or the negative of such terms. These statements are only predictions and involve known and unknown risks, uncertainties and other factors. Although forward-looking statements, and any assumptions upon which they are based, are made in good faith and reflect our current judgment, actual results could differ materially from those anticipated in such statements. Except as required by applicable law, including the securities laws of the United States, we do not intend to update any of the forward-looking statements to conform these statements to actual results.

### **Results of Operations**

We currently have no operating revenue for the three months ended July 31, 2020. We do have customer deposits of \$45,695 which will be recognized as revenue when the units are shipped to the buyers.

Our general and administrative expenses for the three months ended July 31, 2020 was \$189,709 compared to \$221,822 for the same period ended July 31, 2019. The decrease was due primarily to consulting costs.

Interest expenses incurred in the three months ended July 31, 2020 was \$34,860 compared to \$44,524 for the three ended July 31, 2019.

Change in derivative liability resulted in a gain of \$66,056 for the three months period ended July 31, 2020, compared to a gain of \$863,032 for the same periods ended July 31, 2019. We estimate the fair value of the derivative for the conversion feature of our convertible notes payable using the American Binomial Lattice pricing model at the inception of the debt, at the date of conversions to equity, cash payments and at reporting date, recording a derivative liability, debt discount and a gain or loss on change in derivative liability as applicable. These estimates are based on multiple inputs, including the market price of our stock, interest rates, our stock price volatility, and variable conversion prices based on market prices as defined in the respective loan agreements. These inputs are subject to significant changes from period to period; therefore, the estimated fair value of the derivative liability will fluctuate from period to period and the fluctuation may be material.

Total other income and expense for the three months periods ended July 31, 2020 was expense of \$103,114 compared to other income of \$953,089 for the three months period in 2019. The variance is primarily due to the change in derivative liability and debt extinguishment in the three months period in both 2020 and 2019 and loss on notes in the period ended Jul 31, 2020 versus the same period in 2019.

Net income and loss before non-controlling interest for the three and ended July 31, 2020 was a net loss of \$292,823 compared net income of 731,267 for the same three months periods in 2019. After adjusting for our consolidated subsidiary, net loss and net income for the three months ended July 31, 2020 a net loss of \$ 281,996 compared to a net income of \$739,421 for the same periods in 2019, respectively.

### **Liquidity and Capital Resources**

At July 31, 2020, we had total current assets of \$43,352, and total current liabilities of \$4,061,803, resulting in a working capital deficit of \$4,018,451. Included in our current liabilities and working capital deficit at July 31, 2020 are derivative liabilities totaling \$1,029,799 related to the conversion features of certain of our convertible notes payable, convertible notes of \$825,780, net of discount, notes payable related parties of \$1,028,122, accounts payable and accrued expense of \$412,486 and notes payables of \$424,226. We anticipate that in the short-term, operating funds will continue to be provided by related parties and other lenders.

As of July 31, 2020, we had total convertible notes payable of \$825,780, net of discount. Several of the note agreements require repayment through conversion of principal and interest into shares of the Company's common stock. We anticipate, therefore, converting these notes payable into shares of our common stock without the need for replacement financing; however, there can be no assurance that we will be successful in accomplishing this.

During the three months ended July 31, 2020, net cash used in operating activities was \$70,299 compared to cash used of \$34,102 in the same period in 2019. Net cash used in 2020 consisted of net loss of \$292,823 offset by gain in derivative liability of \$66,056 and increase in payables to related parties of \$57,575.

During the three months ended July 31, 2020 net cash provided by financing activities was zero compared to \$50,500 in 2019.

We have had minimal revenue and paid expenses and costs with proceeds from the issuance of securities as well as by loans from investor, stockholders and other related parties.

Our immediate goal is to provide funding for the completion of the initial production of the Offender Alert Passive Scan licensed from CCS. The Offender Alert Passive Scan is an advanced passive scanning system for detecting and identifying concealed threats.

On September 6, 2018, we received funding for the production of up to 100 units at a cost of \$84,500. We built 4 Passive Portal units, two of which will be used in the previously announced BETA Test at a school near Austin Tx. The units have been tested multiple times and performed with a 100% success every time. We are confident that upon the successful conclusion of the Beta Test, we will receive the first orders from school districts that will generate initial revenues to the Company.

We believe a related party and other lenders will provide sufficient funds to carry on general operations in the near term and fund DTC's production and sales. We expect to raise additional funds from the sale of securities, stockholder loans and convertible debt. However, we may not be successful in our efforts to obtain financing to carry out our business plan.

See the notes to our condensed consolidated financial statements for a discussion of recently issued accounting pronouncements that we have either implemented or that may have a material future impact on our financial position or results of operations.

### **Off-Balance Sheet Arrangements**

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to stockholders.

### **Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

This item is not required for a smaller reporting company.

### **Item 4. Controls and Procedures.**

*Evaluation of Disclosure Controls and Procedures.* As of the end of the period covered by this report, we conducted an evaluation, under the supervision and with the participation of our management including our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) ("Exchange Act"). Based on this evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were not effective in ensuring that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, in a manner that allows timely decisions regarding required disclosures.

We operate with a limited number of accounting and financial personnel. Although we retain the services of an experienced certified public accountant, we have been unable to implement proper segregation of duties over certain accounting and financial reporting processes, including timely and proper documentation of material transactions and agreements. We believe these control deficiencies represent material weaknesses in internal control over financial reporting.

Despite the material weaknesses in financial reporting noted above, we believe that our consolidated financial statements included in this report fairly present our financial position, results of operations and cash flows as of and for the periods presented in all material respects.

*Changes in Internal Control over Financial Reporting.* There was no change in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) during our most recently

completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
