

## **Defense Technologies International announces new options to its EBT Station.**

**Del Mar, California (February 11, 2021) – Defense Technologies International Corp. (OTC: DTII) (The Company,) an innovative provider of security technologies with broad and diverse applications, is pleased to ANNOUNCE that it has added an additional tool for use in ‘Contact Tracing’ programs in its Elevated Body Temperature Station firmware.**

**EBT – Contact Tracing:** This tool allows name and image entries to the internal database of the EBT Station, which in turn uses facial features to identify the scanned person and then log the date, time, name of person, if a mask was worn or not, and the subject’s body temperature to an internal log file. The log file later can be uploaded for use in spreadsheets or other Contract Tracing data collection systems.

### **EBT-Elevated Body Temperature Detection**

**The PSSI-EBT Station offers an affordable temperature monitoring detector with these following features:**

- **Battery-powered and portable**
- **Voice warning of Elevated Temperature and mask wearing warning (optional)**
- **Optional detection of mask wearing**
- **Optional Contract Tracing logging**

#### **Successful testing by the Security Department at an US International Airport.**

Based on the successful demonstration of our EBT Station and testing by Security Department personnel of an International Airport, we are confident that this will initiate a major market for our EBT Station, and for our Passive Portal weapons detection walk-through scanner.

#### **Successful testing by the Security Department at an US International Airport.**

Based on the great success and acceptance shown during our demonstrations of the EBT Station, along with concentrated testing by Security Department personnel and offices, at an International Airport, we are confident that this will instigate a major market for our EBT Station and also believe that the EBT Station will expose and further open potential markets for our Passive Portal weapons detection walk-through scanner.

***“I am very pleased with the opportunity to introduce our safety products to major markets where public security and safety is theirs as well as our... greatest concern.”*** stated Merrill W. Moses, President and CEO, Defense Technologies International.

### **PRODUCTION:**

#### **EBT Stations (Elevated Body Temperature):**

- **10 Units on inventory with options for Masks and Contact Tracing.**

#### **Passive Portals (Passive Walkthrough Weapons Detection)**

- **35 Units on inventory.**

## **2021**

**With the pandemic coming under control with vaccinations across the US and the world, we at DTII/PSSI look to a successful year.**

### **About DTII and its subsidiary 'Passive Security Scan, Inc' (PSSI).**

PSSI a private Utah Corporation and Subsidiary of Defense Technologies International Corp. (DTII). Passive Security Scan Inc. was formed to bring our *Passive Scanning Technology*<sup>™</sup> and our *Passive Portal*<sup>®</sup> *weapons and elevated temperature detection systems* to the market, and to improve public safety with a system specifically designed for public and private schools, sports arenas, and other public venues. The *Passive Scanning Technology*<sup>™</sup> was developed in 2005 and has been continually improved upon with the newest technological advances. The *Passive Portal* gateway is our newest model ready for production and for the market.

For more information on the Passive Security Scan Technologies, the *Passive Portal*<sup>®</sup> and *EBT Station*<sup>™</sup>, please visit <http://www.defensetechnologiesintl.com/> and <https://www.passivesecurityscan.com/> or <https://www.passiveportal.com/>
